AbsFileVisitor

Class in package 'Model'

AbsFileVisitor
Version 1.0 Phase 1.0 Proposed
User created on 2019-04-16. Last modified 2019-04-16

INCOMING STRUCTURAL RELATIONSHIPS	
⇒ Generalization from FileStringFindReplace to AbsFileVisitor	[Direction is 'Source -> Destination'.]

INCOMING STRUCTURAL RELATIONSHIPS

➡ Generalization from FileChecksumCalculator to AbsFileVisitor

[Direction is 'Source -> Destination'.]

OPERATIONS

◆ AbsFileVisitor () : Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ ~AbsFileVisitor () : Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

◆ clone () : AbsFileVisitor* Public

[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

◆ visit (prm1 : class AudioFile&) : void Public

[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

◆ visit (prm1 : class MemAudioFile&) : void Public

[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

FileChecksumCalculator

Class in package 'Model'

FileChecksumCalculator
Version 1.0 Phase 1.0 Proposed
User created on 2019-04-16. Last modified 2019-04-16

OUTGOING STRUCTURAL RELATIONSHIPS

↩ Generalization from FileChecksumCalculator to AbsFileVisitor

[Direction is 'Source -> Destination'.]

ATTRIBUTES

◆ m_checkSum : uint64_t Private

[Is static True. Containment is Not Specified.]

ASSOCIATIONS

✎ Association (direction: Source -> Destination)

ASSOCIATIONS

Source: Public (Class) ChecksumCommand

Target: Private m_visitor (Class)
FileChecksumCalculator

OPERATIONS

clone () : FileChecksumCalculator* Public
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

combineHash (h1 : uint64_t , h2 : uint64_t , i : size_t) : uint64_t Private
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

computeChunkHash (chunkSize : size_t , chunkData : char*) : uint64_t Private
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

FileChecksumCalculator () : Public
 Properties:
 initializer = m_checkSum(0)
 bodyLocation = classDec
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

get_checkSum () : uint64_t Public
 Properties:
 bodyLocation = classDec
 [Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]

visit (prm1 : class AudioFile&) : void Public
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

visit (prm1 : class MemAudioFile&) : void Public
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

FileStringFindReplace

Class in package 'Model'

FileStringFindReplace
 Version 1.0 Phase 1.0 Proposed
 User created on 2019-04-16. Last modified 2019-04-16

OUTGOING STRUCTURAL RELATIONSHIPS

← Generalization from FileStringFindReplace to AbsFileVisitor
 [Direction is 'Source -> Destination'.]

ATTRIBUTES

ATTRIBUTES

 <code>m_outFile : std::shared_ptr<AbsAudioFile> Private</code>	[Is static True. Containment is Not Specified.]
 <code>m_replaceString : std::vector<char> Private</code>	[Is static True. Containment is Not Specified.]
 <code>m_searchString : std::vector<char> Private</code>	[Is static True. Containment is Not Specified.]

ASSOCIATIONS

 Association (direction: Source -> Destination)

Source: Public (Class) StringFindReplaceCommand

Target: Private m_visitor (Class)
FileStringFindReplace

OPERATIONS

 <code>clone () : FileStringFindReplace* Public</code>	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]
 <code>FileStringFindReplace (sOrig : std::vector<char>& , sNew : std::vector<char>& , outFileName : std::string&) : Public</code> Properties: initializer = <code>m_searchString(sOrig),m_replaceString(sNew),m_outFile(std::make_shared<MemAudioFile>(outFileName))</code> [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 <code>FileStringFindReplace (sOrig : std::vector<char>& , sNew : std::vector<char>& , outFile : std::shared_ptr<AbsAudioFile>&) : Public</code> Properties: initializer = <code>m_searchString(sOrig),m_replaceString(sNew),m_outFile(outFile)</code> [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 <code>findReplace (p_beg : char* , p_end : char*) : void Private</code>	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]
 <code>visit (prm1 : class AudioFile&) : void Public</code>	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]
 <code>visit (prm1 : class MemAudioFile&) : void Public</code>	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

AbsAudioFile

Class in package 'Model'

AbsAudioFile
Version 1.0 Phase 1.0 Proposed
User created on 2019-04-16. Last modified 2019-04-16

INCOMING STRUCTURAL RELATIONSHIPS

⇒ Generalization from MemAudioFile to AbsAudioFile

[Direction is 'Source -> Destination'.]

⇒ Generalization from AudioFile to AbsAudioFile

[Direction is 'Source -> Destination'.]

ATTRIBUTES

◆ defaultChunkSize : size_t Protected Const = 16

[Is static True. Containment is Not Specified.]

◆ headerSize : size_t Protected Const = sizeof(size_t)

[Is static True. Containment is Not Specified.]

◆ m_chunkSize : size_t Private

[Is static True. Containment is Not Specified.]

◆ m_fname : std::string Private

[Is static True. Containment is Not Specified.]

◆ m_numberChunks : size_t Private

[Is static True. Containment is Not Specified.]

ASSOCIATIONS

✎ Association (direction: Source -> Destination)

Source: Public (Class) Chunk_iterator_base

Target: Private m_audioFile (Class) AbsAudioFile

OPERATIONS

◆ AbsAudioFile (fname : std::string& , chunkSize : size_t) : Public

Properties:

initializer = m_fname(fname),m_chunkSize(chunkSize),m_numberChunks(0)
bodyLocation = classDec

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ ~AbsAudioFile () : Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

OPERATIONS
<p>◆ accept (v : class AbsFileVisitor&) : void Public [Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]</p>
<p>◆ addChunk (iter : Chunk_iterator&) : void Public [Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]</p>
<p>◆ begin () : Chunk_const_iterator Public [Is static False. Is abstract True. Is return array False. Is query True . Is synchronized False.]</p>
<p>◆ begin () : Chunk_iterator Public [Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]</p>
<p>◆ end () : Chunk_const_iterator Public [Is static False. Is abstract True. Is return array False. Is query True . Is synchronized False.]</p>
<p>◆ end () : Chunk_iterator Public [Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]</p>
<p>◆ getChunkSize () : size_t Public Properties: bodyLocation = classDec [Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]</p>
<p>◆ getHeaderSize () : size_t Public Properties: bodyLocation = classDec [Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]</p>
<p>◆ getName () : std::string& Public Const Properties: bodyLocation = classDec [Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]</p>

<p>◆ readChunk (buf : char*) : void Protected [Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]</p>
<p>◆ seekChunkg (p : size_t) : void Protected</p>

OPERATIONS	
	[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]
 seekChunkp (p : size_t) : void Protected	[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]
 setChunkSize (chunkSize : size_t) : void Protected Properties: bodyLocation = classDec	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]
 setNumberChunks (numberChunks : size_t) : void Protected Properties: bodyLocation = classDec	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]
 tellChunkg () : size_t Protected	[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]
 tellChunkp () : size_t Protected	[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]
 writeChunk (buf : char*) : void Protected	[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

AudioFile

Class in package 'Model'

AudioFile
Version 1.0 Phase 1.0 Proposed
User created on 2019-04-16. Last modified 2019-04-16

OUTGOING STRUCTURAL RELATIONSHIPS	
 Generalization from AudioFile to AbsAudioFile	[Direction is 'Source -> Destination'.]
ATTRIBUTES	
 m_stream : std::fstream Private	[Is static True. Containment is Not Specified.]
OPERATIONS	
 accept (v : class AbsFileVisitor&) : void Public	

OPERATIONS	
	[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]
 addChunk (iter : Chunk_iterator&) : void Public [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 AudioFile (fname : std::string&) : Public const size_t AbsAudioFile::defaultChunkSize; Properties: initializer = AbsAudioFile(fname) [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 ~AudioFile () : Public [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 begin () : Chunk_const_iterator Public [Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]	
 begin () : Chunk_iterator Public [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 end () : Chunk_const_iterator Public [Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]	
 end () : Chunk_iterator Public [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 readChunk (buf : char*) : void Protected [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 seekChunkg (p : size_t) : void Protected [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 seekChunkp (p : size_t) : void Protected [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 tellChunkg () : size_t Protected [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 tellChunkp () : size_t Protected [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	
 writeChunk (buf : char*) : void Protected [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]	

MemAudioFile

Class in package 'Model'

MemAudioFile
Version 1.0 Phase 1.0 Proposed
User created on 2019-04-16. Last modified 2019-04-16

OUTGOING STRUCTURAL RELATIONSHIPS

← Generalization from MemAudioFile to AbsAudioFile

[Direction is 'Source -> Destination'.]

ATTRIBUTES

◆ m_getP : size_t Private

[Is static True. Containment is Not Specified.]

◆ m_memBuffer : std::vector<char> Private

[Is static True. Containment is Not Specified.]

◆ m_putP : size_t Private

[Is static True. Containment is Not Specified.]

◆ m_subject : std::shared_ptr<AudioFile> Private

[Is static True. Containment is Not Specified.]

OPERATIONS

◆ accept (v : class AbsFileVisitor&) : void Public

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ addChunk (iter : Chunk_iterator&) : void Public

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ begin () : Chunk_const_iterator Public

[Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]

◆ begin () : Chunk_iterator Public

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ end () : Chunk_const_iterator Public

[Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]

◆ end () : Chunk_iterator Public

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

OPERATIONS

◆ `get () : char* Public Const`

Properties:

`bodyLocation = classDec`

[Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]

◆ `get () : char* Public`

Properties:

`bodyLocation = classDec`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `MemAudioFile (fname : std::string&) : Public`

Properties:

`initializer =`

`AbsAudioFile(fname),m_subject(std::make_shared<AudioFile>(fname)),m_memBuffer(m_subject->getNumberChunks()
() * m_subject->getChunkSize() + headerSize),m_putP(0),m_getP(0)`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `~MemAudioFile () : Public`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `readChunk (buf : char*) : void Protected`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `seekChunkg (p : size_t) : void Protected`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `seekChunkp (p : size_t) : void Protected`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `size () : size_t Public`

Properties:

`bodyLocation = classDec`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `tellChunkg () : size_t Protected`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `tellChunkp () : size_t Protected`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ `writeChunk (buf : char*) : void Protected`

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

AbsCommand

Class in package 'Model'

AbsCommand

Version 1.0 Phase 1.0 Proposed

User created on 2019-04-16. Last modified 2019-04-16

INCOMING STRUCTURAL RELATIONSHIPS	
➡ Generalization from TransformCommand to AbsCommand	[Direction is 'Source -> Destination'.]
➡ Generalization from ChecksumCommand to AbsCommand	[Direction is 'Source -> Destination'.]
➡ Generalization from StringFindReplaceCommand to AbsCommand	[Direction is 'Source -> Destination'.]

OPERATIONS

◆ AbsCommand () : Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ ~AbsCommand () : Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

◆ execute (prm1 : class AbsAudioFile&) : void Public

[Is static False. Is abstract True. Is return array False. Is query False. Is synchronized False.]

ChecksumCommand

Class in package 'Model'

ChecksumCommand
Version 1.0 Phase 1.0 Proposed
User created on 2019-04-16. Last modified 2019-04-16

OUTGOING STRUCTURAL RELATIONSHIPS

↔ Generalization from ChecksumCommand to AbsCommand

[Direction is 'Source -> Destination'.]

ATTRIBUTES

◆ m_visitor : FileChecksumCalculator Private

[Is static True. Containment is Not Specified.]

ASSOCIATIONS

✎ Association (direction: Source -> Destination)

Source: Public (Class) ChecksumCommand

Target: Private m_visitor (Class)
FileChecksumCalculator

OPERATIONS

◆ ChecksumCommand () : Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

OPERATIONS

◆ execute (prm1 : class AbsAudioFile&) : void Public
 [Is static False. Is abstract False. Is return array False. Is query False. Is synchronized False.]

◆ get_checkSum () : uint64_t Public

Properties:

bodyLocation = classDec

[Is static False. Is abstract False. Is return array False. Is query True . Is synchronized False.]

StringFindReplaceCommand

Class in package 'Model'

StringFindReplaceCommand

Version 1.0 Phase 1.0 Proposed

User created on 2019-04-16. Last modified 2019-04-16

OUTGOING STRUCTURAL RELATIONSHIPS

← Generalization from StringFindReplaceCommand to AbsCommand

[Direction is 'Source -> Destination'.]

ATTRIBUTES
